

**UNDER SECRETARY OF STATE
FOR MANAGEMENT
WASHINGTON**

September 5, 2001

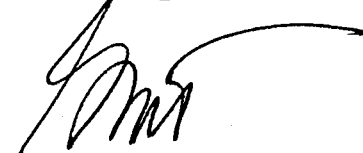

Dear Tom:

Thank you for your note of August 7. I forwarded the fact sheet to the Office of Overseas Buildings Operations (OBO) and found out that they are already familiar with Surge Suppression, Inc., in general and more specifically with the TVSS product.

As a matter of fact, this past March several of OBO's electrical engineers attended Surge Suppression's presentation at the Key Bridge Marriott. OBO has already installed the TVSS devices in our new embassy in Doha. They are also planning to use this equipment in the new main switchgear, currently being fabricated and installed at our embassy in Belgrade. Technical information on the TVSS product has been distributed throughout OBO, especially to the Facility Management Division for application under the power quality/repairs program.

If you have further questions regarding our use of the TVSS systems, you may contact Mr. William Miner, Acting Director for Design and Engineering, at 703-875-6119.

Sincerely,

Grant S. Green, Jr.

Mr. William T. Callaway, Jr.,
Vice President, Government Sales,
Surge Suppression, Inc.,
P.O. Box 674,
Destin, Florida 32540-0674.
