Sandersville, GA 31082**

September 19, 2002

Dear Scott:

I have lived in my present home since April 1989. During that time I have had numerous losses due to lightning strikes. I have replaced several, telephones, two garage door opener motors, 2 computer modems, numerous surge strips attached to the computer, a vcr, 2 control boards in the same heat pump and 2 control boxes for an underground radio fence.

In the spring of 2001, I had one of your surge suppression systems installed on my electrical panel, as well as the units on the tv cable and telephone lines. We are nearing the end of our second thunderstorm season and have not suffered one single loss in two seasons! Some of our neighbors have continued to have problems. They do not have one of your systems.

I feel that this system has been well worth the original costs, not only in savings of insurance deductibles, but because I have had no down time because of lightning damage. I would highly recommend this system to anyone considering it.

If you have anyone considering one of your systems, please feel free to give them my name and number.

Sincerely,

Tony Anthony
