Press Release

BROOKSVILLE, FL – August 18, 2016 – Surge Suppression, LLC (SSI), An ILSCO Company, has received Canadian Standards Association (CSA) product safety listings on our line of data, telecom, coaxial and current loop surge protective devices. These products will now be labeled with the applicable UL and CSA marks, and are listed to UL 497B and CAN/CSA-C22.2 N. 226-92. We are pleased to add Canadian Certification to our extensive line surge protective devices, once again demonstrating our commitment to providing customers with the highest standard of safety and protection.

These products have broad applications including the protection of flow sensors, temperature and pressure sensors, level sensors, serial communication networks and scales to name a few. Like all SSI products, our data, telecom, coaxial and current loop surge protective devices are covered by the industries best warranty, assuring years of protection when you need it most.

According to SSI Executive Vice President of Engineering, Ron Hotchkiss, “The CSA certification of our communication, data and current loop surge protective devices now allows SSI the opportunity to provide the same time-proven and application specific surge protection solutions in Canada that it has for the last few decades in the United States. Along with our complete line of CSA certified AC power surge protective devices, experience and expertise, SSI is positioned to offer complete facility protection in Canada from one source.”

Surge Suppression, LLC’s extensive offering of lightning and surge protective devices offer protection for medium voltage, power panel, individual equipment, data, telecom, coaxial and current loop application. We offer products to protect your entire range of power needs from .5VDC to 7200 VAC.
