

FMP0240KIT

The FMP0240KIT allows the Surge Tracker ST2-100 and ST3 units to be installed flush with the drywall. Designed for installations with flush mount electrical panels, or anytime it is desired to have the SPD mounted completely level with the wall. The plate covers the area that was cut-out to install the suppressor. The FMP0240KIT includes the steel plate, 4 screws, and 4 wall anchors needed to mount the unit in drywall.
